Keep smiling with  
complete dental and  
orthodontic care.

Staying with your dentist for  
orthodontic needs is more than  
just a time-saver. It also means  
your child gets consistent,  
holistic care. Have questions  
about how we'll handle your  
child's individual needs? We're  
happy to speak with you prior  
to implementing a care plan.

Hi, I'm Archy Alpaca.  
Your dentist tells me  
it might be time to get  
braces. No biggie!  
We're all smiles here.

Our practice is a credentialed provider of archy™ braces, a new system that gives us everything we need to place braces here at our office.

We're using the most current technologies and best practices to create the best experience and results possible for our patients and their families. We think you'll love how archy™ fits into your child's existing dental maintenance routine. The best part? No more trips to the orthodontist! From appointment-setting, to placement and adjustments, to paying your bill, you and your family get to stay in the comfort of the office and staff you already know and trust.

## FAQs & WHAT TO EXPECT

We're here to answer any questions you have as a parent or guardian of a new archy™ patient.

### **How does archy™ differ from other orthodontic solutions I've heard about?**

archy™ starts as traditional wire braces, just like at the orthodontist. But with good cooperation, many of our patients can graduate to invisible aligners. Your regular family dentist will administer your child's entire treatment plan, including retainers.

### **How often will my child need to come in for adjustments?**

As with all orthodontic treatment, the frequency of visits depends on the progress you're making. But generally speaking, you'll see your dentist about once a month.

### **How do you handle billing and payment?**

Your dentist will provide you with a full cost estimate based on the recommended treatment plan. There are no additional fees for selecting archy™.

**Wait! Don't you have to be an orthodontist to put on braces?**

Nope! archy™ providers learn everything they need to know from the experts... and a real orthodontist keeps an eye on things every step of the way. You never even have to leave your dentist's office. Pretty cool, huh?
